To My Trucking Friends.

Many market gardeners last year had a hard season, where they had big crops the prices were unsatisfactory, and where prices were good, rain or drought so interfered with their operations that the money return was not what it should have been. This is the general report that comes to me from many sections, so it is a matter of congratulation to know that as a rule those truckers planting Maule's Seeds last year had one of the most satisfactory seasons they ever had. While other seedsmen have been complaining to me that their market gardener trade had a disastrous year, so far as I can find out, my customers have been fairly well satisfied with the result, and are certainly to be congratulated. There is no reason, from the present outlook, why 1905 should not be a banner year for business in this country, and when business is good, vegetables always sell well, so I think I am perfectly safe in recommending all my trucking friends to extend where possible their operations, as they are very sure to get good prices for all they may be able to raise. Seed crops this year have been satisfactory; there are a few shortages on some varieties of late peas, also some varieties of muskmelon; the only serious failure being that of green pod and wax beans, which are again very short, in fact there is really not enough seed to go round. Otherwise I have harvested full crops of everything quoted in this Price List, consequently have been able to reduce my prices on many varieties below last year. This is especially true of cucumbers, sweet corn, etc.

All my old friends know just what this price list is:

A PLAIN PRICE LIST FOR BUSY PEOPLE RAISING TRUCK FOR SALE.

Illustrations and descriptions of all the varieties priced herewith will be found in my Seed Book for 1905, which my friends tell me is by far the best and most complete Seed Catalogue ever published in this country. As usual it is mailed free to all who apply for it.

Thanking you for a trade last year that exceeded by all odds any business I have ever done, and trusting to receive a continued share of your esteemed patronage, not only this year, but for years to come,

I remain

Always yours to command,

Wm. Henry Maule

Philadelphia,
January 1st, 1905.

Maule's Special 1905 Price List for Truckers Only.

The figures quoted in the following pages are intended for those in the business of raising truck for sale, and are not intended for private planters. Please remember that since 1889 Maule's Seeds have not been sold to dealers. If wanted they must be ordered direct from Philadelphia.

My Four-Leaf Clover GUARANTEE.

1. **SAFE ARRIVAL.** I guarantee that all goods sold by me shall reach my customers in good order.
2. **MONEY INSURED.** I guarantee to hold myself responsible for the safe arrival of all remittances sent me by P. O. order, draft, check or registered letter.
3. **FREE BY MAIL.** I guarantee to deliver, free of all charges, all garden seeds, when 10 cents per pound or 15 cents per quart is added to prices quoted in this list.
4. **AS REPRESENTED.** I guarantee my seeds to be just as represented. If they prove otherwise, I will refill the order free of charge; but it must be understood that I do not guarantee the crop any further than to refill the order.

What More Could Be Asked?

I guarantee everything but the crop. Protected from loss by this most liberal of all guarantees, every one can rest assured of the most entire satisfaction.

The Prices Given in This List

Are for seeds carefully packed and delivered free on board in this city, to express, railroad or steamship company; but the purchaser **MUST** in all cases pay the freight. If you want anything sent by mail, 10 cents per pound, or 10 cents per quart for sweet corn, and 15 cents per quart for peas and beans, must be added to prices quoted. **One-quarter and one-half pounds may be ordered at the pound prices. Quarter bushels and half bushels at the bushel rate.**

TERMS:

CASH WITH ORDER, or satisfactory bank reference. Money may be sent by post office order, draft or check. If you don't remit in any of these ways, **REGISTER THE LETTER**; you can do this at any post office in America. I will send C. O. D. by express on orders exceeding \$10, if 25 per cent. of the money is remitted with the order. I cannot ship C. O. D. by freight. I receive postage stamps same as cash.

ONIONS.

RELIABLE ONION SEED.—I harvested last fall a magnificent crop of onion seed, as fine and plump as I have ever seen. No better seed was ever grown, or can be grown at any price; but unfortunately I have on hand over 20,000 pounds more than my last year's sales, so I am quoting on **the very best onion seed ever offered in America lower prices than ever quoted before.** It is hardly necessary to say that I do not wish to carry over any of this seed, and have no doubt at the remarkably low prices named below for the very best seed, I shall have no trouble in moving this large surplus.

Maule's New Commercial Yellow Globe Onion

The best new variety since the Prizetaker was first offered the American public. Unquestionably the best seller and best keeper of any sort now on the market. Onions harvested September 1st perfectly sound and merchantable June 1st.

My attention was first called to the Commercial Onion three or four years ago by one of the largest growers of onions in this country, who told me that he had been for years selecting them from my original Prizetaker and breeding them down to a size that he considered more merchantable. His efforts have been rewarded by securing an onion fully as handsome as the Prizetaker in every way; of more uniform size, and whose keeping qualities were simply remarkable and decidedly superior to the parent variety. The picture above well illustrates the size and shape of the Commercial. Six hundred bushels per acre have been no unusual yield, and this quantity has been frequently surpassed. Sixteen years ago I introduced the Prizetaker onion, and in all that time I have not found a single variety that could equal, let alone surpass it, in any way, until now. I take great pleasure in offering my customers Maule's New Commercial Onion, a variety that I am satisfied will prove fully as popular and equally as desirable. As this is the second year for the Commercial the seed is naturally scarce; but I am very glad to be able to offer it in pound lots at a very reasonable price for a brand new sort.

Pound, \$1.75; 10 pounds, \$15.00.

J. E. Willits, Fredericktown, Ohio.—I planted your New Commercial Onion in a box in the house on April 1st and transplanted in the open ground the middle of May in rows 18 inches apart, and 5 inches apart in the rows, and have just gathered them. They are fine, large, smooth onions, nearly globular in shape, scarcely any but are over 2 inches in diameter and many measure over 4 inches, yielding at the rate of 750 bushels per acre. I consider them a very valuable market onion.

Geo. W. Hodges, Saratoga, N. Y. Box 203.—The New Commercial Onions are symmetrical in shape, of a beautiful light straw color, very even in size with no small ones at all, of mild flavor and exceedingly solid. They ripen a few days in

advance of Yellow Danvers. They had a small top and very slim neck, and ripened thoroughly. I think they are a decided acquisition to the list of Yellow Globe Onions.

Wm. D. Carr, Hebron, Ill.—Your New Commercial Onion is entirely satisfactory. It has proved the best yielder of five varieties in my field. It roots strongly, and resists drought well, is small necked and well shaped. Average weight one pound. My new Commercial won first premium at the McHenry Co. Fair, also winning first as part of a collection of onions. Permit me to thank you for introducing so excellent a variety.

MAULE'S EARLIEST OF ALL TOMATO

The Greatest Novelty in Tomatoes Offered in Years

The one extraordinary qualification above all others I have to make for this new tomato is its **wonderful earliness**. Until this year, when I now offer for the first time Maule's Earliest of All, I have recommended Earliest Advance as the ne plus ultra of early Tomatoes; but Earliest Advance while a very early variety, will now have to take a back seat, for Maule's Earliest of All is not only fully 3 days earlier, but at the same time is of much larger size, of a magnificent color and delicious flavor. In addition it is not liable to crack and is very free from core. While possibly not quite as smooth as the Matchless, it is by no means rough, as can be seen from the illustration, which is an excellent representation of this superior variety. Graham & Johnson, of Reynoldsburg, Ohio, probably the largest growers of Tomato seed in the country, having made it their special business for years, are considered by all the leading seedsmen about the best judges of Tomatoes in America; they have this to say about it: "Maule's Earliest of All is of bright red color and good size, a little irregular in shape and a good yielder for so early a variety. We consider it as early as any we have ever grown. Its fruit was all picked earlier than any other variety, although the plants were set several days later." Such a recommendation from such celebrated growers, who have experimented with hundreds upon hundreds of varieties, should at once stamp Maule's Earliest of All as a variety **worthy of trial by every gardener in America**. It is well to bear in mind that while there are half a dozen new tomatoes offered every year, but few ever amount to anything. I already have in the Matchless and Ignatum about the perfection as to size, shape, productiveness, etc. It remains for Maule's Earliest of All to fill the only niche that is vacant in the recent improvement of this delicious vegetable. A really first-class early Tomato has not been offered to the American public since the introduction of the Advance, almost a dozen years ago; consequently it is with great pleasure I offer my customers this year a tomato of **such superlative merit in that one feature, viz., earliness** (which is really the most important quality of all, not alone to the market gardener, but to the home gardener as well). I of course anticipate an enormous demand for seed of Maule's Earliest of All, would advise all my friends to favor me with early orders. It is for sale this season in packets only, containing 50 seeds each.

The above description of Maule's Earliest of 1892, when I first offered Maule's Earliest of All, it is still the leading extra early tomato, and

**FOUR DAYS TO A WEEK
OR ANY OTHER EX**

Since 1892 my friends have made tens of thousands of orders, and if you have not given this wonderful variety a trial, do not include it in your order for 1905. **Pound,**
